

Today, more and more women are building their careers in the construction industry, with some achieving top leadership positions. The Convention for Women in Construction (KUBINA) which is now in its fifth year, was the brainchild of Datuk Rosnah Abdul Rashid Shirlin, the Deputy Minister of Works to encourage and celebrate the participation of women in the construction industry.

This year, we recognize the role that women leaders in the construction industry play in enhancing innovation and the use of technology in construction. Therefore, we converge KUBINA with the inaugural International Construction Transformation Conference 2018 (ICTC 2018), so that all industry leaders regardless of gender will share the same stage and audience who will learn and be inspired from their invaluable knowledge and experience.

As such, we call upon all members of the construction fraternity and sorority alike, to join us at the KUBINA 2018, co-located with the ICTC 2018.

Organiser:

In conjunction with:
